

Success Story: Safer Use IPM in Jordan & for International Markets

-Mazen

Insect and mite exclusion mesh protects young green beans

Spot application of insecticides to pest hotspots saves insecticide and reduces residues.

Supports hold plants

Daily monitoring of plants for pests reduces surprises

Cucumbers grow pest-free

Daily monitoring for pest-free squash

Basil gets a boost

Green beans and mini tomatoes

Green beans fill an important winter production niche.

Mini tomatoes do well for export.

Release of biocontrols helps green beans fight pests.

Daily monitoring for pests is critical for success.

Crops

**Yellow
Peppers**

**Cabbage
stays
White-
fly free.**

**Red
Peppers**

**Mazen's
IPM
market**

This insect exclusion mesh-protected farm near the airport grows crops during the winter niche market.
